

We Believe....

OWF YUNLIN
雲林離岸風場

A decision to stop the job, is not a waste of time. In the long run it can actually save time.

We should protect and look after others the way we look after ourselves.

**Nobody gets hurt,
Nothing gets harmed**

By asking questions and understanding the task, we start off on the right foot.

We can get to go home, as we arrived, if we follow the rules and work safely.

By taking time to assess the risk and the surroundings before starting the task, is time well spent.

In understanding the task and following the guidance.

Everyone was once upon a time "New". So, we are always willing to share our knowledge.

If something changes, we stop and take the time to ask why.

Our wellbeing is not just about being accident free, it is also about being mentally ok.

Where PPE is necessary, we will wear it and mind it.

Our office environment is as important for us to keep right as our sites.

No tasks should be one person task. No one should work alone.

Where we see room for improvements, we will highlight our ideas and receive feedback.
